# Socket Bluetooth Scanner
## Connecting to Apple or Android Devices

**SCOUTIQ**
PRECISION SIMPLIFIED

## Step 1: Reset Device:

1. Power on the scanner.
2. Press and hold down the trigger button.
3. Press and hold down the power button.
4. After you hear 3 beeps, release both buttons.

## Step 2: Turn on Keyboard Mode:

## Step 3: Make Bluetooth Discoverable

## Step 4: Scan Code Given on Device

Once the Socket Scanner has been set to discoverable (step 2), select the device from your phones Blutooth menu.

Next, enter the code that pops up using the barcodes on the right.

Scan "END" after you have entered the code.

**Beep Off**

**Beep On**

**Vibrate Off**

**Vibrate On**
